

ABSTRACT

A management apparatus 12 generating a different plurality of signature data by using its own secret key
5 and providing this as disc ID's to a disc production apparatus 14 is provided. The disc production apparatus 14 produces a plurality of disc type recording media 2 recording a plurality of said disc ID's. A reproduction apparatus 15 reads out the disc ID from a disc type
10 recording medium 2 before playing the reproduction apparatus 15 and verifies this based on public key data of the management apparatus 12.
